# BETAFENCE

Zenturo® Super
Zenturo® Wall

Panels

Zenturo Super is a complete fencing solution with a high design content. The panels can be used as single panels or for the creation of gabion walls.

Product detail

BENEFITS

Extremely high strength
Zenturo Super panels are exceptionally strong due to the narrower meshes (compared to Zenturo Classic panels).

Functional Design
Zenturo Super panels are stronger than Zenturo Classic, through the narrower meshes and thus making them ideally suited for gabion walls. In combination with the Zenturo post concept and associated spider fixators, a wide variety of infills can be used to create a personalised aesthetic look.

Easy installation
The Zenturo Super panels can be combined with the Bekaclip posts (to be mounted with collars) or the Zenturo post system (with spider fixators) for gabion walls.

Complete system
The complete Zenturo Super system consists of panels in 6 heights, to be installed with 2 types of posts with a specific fixation system, and a Zenturo Classic swing gate. In this way, you design your own unique, secure fencing system.

Panels

The Zenturo Super panels are flat panels with double (2D) alternating horizontal wires for added strength. The panels are 2005 mm wide and are available in heights from 655 mm up to 2005 mm.
Mesh sizes: 100 x 50 and 50 x 50 mm
Horizontal wire diameter: 5.00 mm
Vertical wire diameter: 4.15 mm
As a finishing touch, we have developed an extra panel (with wire diameter of 3.80 mm) which needs to be fixed at the top of the gabion wall (once the gabion wall has been filled up). It is available in anthracite (BF7016M).

Posts and fixing systems

Zenturo posts (available in concrete or on baseplate)
The Zenturo Post is a rectangular tube with a cross section of 120 x 40 mm and a wall thickness of 2.00 mm. Galvanised and polyester plastic coated.

Gates

The Zenturo Super system can easily be combined with the Zenturo Classic swing gate (single version).

Coating technique

The panels are made of galvanised wire, and an adhesion layer is provided for perfect adhesion with the polyester top coating (min. 100 micron).
The posts are internally and externally galvanised (min. layer thickness 275g/m², both sides combined) according to Euro standard EN 10346, after which an adhesion layer is applied and polyester plastic coated (min. 60 micron).

Colours

Anthracite grey BF7016M
Other colours upon request

Panel infills

The Zenturo Super panel can be personalized with different unique and modern infills:
Note: use adapted postdiameters when filling the panels completely with strips.

Pixels
These square and rectangular plastic elements perfectly fit into the panel's different mesh sizes: 100x50 and 50x50 mm. The pixels can be easily clicked on the panel and can be used to form numbers, words or patterns on the fence... Available in metallic anthracite.

Flexo Strips
The Zenturo Super panels can be filled with the Flexo Strip. The flexible plastic strip is available in 2 widths (44 mm for mesh width 50 mm, 94 mm for mesh with 100 mm) and is woven through the panel's meshes, both in vertical and horizontal direction. Available on rolls of 50 m (to be cut to length), in anthracite.

The accessories can be fitted at time of installation or later. Zenturo Super allows you to update your style without changing the fence.

ASSORTMENT ZENTURO SUPER
